News of the State.

Special to the Indianapolis Journal. LOGANSPORT, Ind., Nov. 6.-The Logansport, Rochester & Northern Traction Company cleverly outwitted the Wabash Railrowi Company to-night in the attempt of the latter to tear up the tracks laid by the former on the Wabash Company's alleged right of way. The Wabash sent special trains in from both ends of the road, carrying several hundred section men and a wrecking crew, together with a steam derrick, to tear up the traction company's track. Just as the men were about to go to work the traction people stopped them with an order from the court notifying them that a restraining order had been granted on petition of the traction people. The Webash was compelled to withdraw its men, and they were sent back to the points from which they came. The Wabash also procured an injunction restraining the traction people from entering upon the for-

mer's right of way. The Logansport Common Council last Two Cents Added to the Price, Making night granted to the Logansport, Rochester & Northern Traction Company a right of way through the city from the eastern to the western limits by amending the ordinance of the company granted several years ago. This action will give the Indianapolis Northern Traction Company the much-desired eastern entrance to the city, which has been the bone of contention interurban railway matters in this city. The companies are allied, the L., R. & N. having long since been merged with the McCullach interests

The amendment was passed not without an effort of the friends of the Boyd interests in the Council to have the proposition rejected, but the minority of the Council, which has always been friendly to the Mc-Culloch interests, having won one of the majority over to its side, succeeded in getting a tie vote on the passage of the amendment, which was then decided by Mayor Vaughn voting in favor of it. On the floor of the Council Alderman J.

H. Reitemeier, who has heretofore been the champion of the Boyd interests, sprung a surprise when he declared that he believed the Boyd interests had sold out to McCulloch, or that a sale between the two companies is now being negotiated and that the entire street and interurban railway situation in Logansport would be under the control of one company in less than six weeks. The representatives of both companies deny that a sale has been made, but do not deny positively that negotiations art pending.

This morning at 3 o'clock the traction company began laying tracks on Duret street, one of the streets granted them in the amendment, and by 6 o'clock this morning had the track laid a distance of two The Wabash Railroad Company elaims that Duret street is a portion of its right of way, and while the men were at work this morning completing the track the Wabash ran a huge freight engine and a cut of cars across the street on a spur leading from the main track and blocked the crossing. Then the traction people were served with a notice from the Wabash demanding that the former remove their material from the steam company's alleged right of way, but the traction people paid no attention to the notice and proceeded with the work, although no attempt was made to remove the engine and cars which the Wabash continues to maintain on the crossing.

MARION, Ind., Nov. 6 .- John P. McGeath, of Hartford City, and W. M. Amsden and W. J. The name of the proposed road is the Oil Belt Traction line, the company to be incorporated under the title of the Oil Belt Traction Company. The term of the franchise is fifty years and the road is to be pleted and in operation by Dec. 1, 1904. It is the intention of the company to secure private fight of way as far as possible, and when this is secured the work of building the road will go rapidly forward. While the new company is to be independent it will connect at each end with other electric railways the Union Traction Company of Indiana at Fairmount and at Hartford City with two interurban lines, one of which is already constructed between Hartford City and Muncie.

This is an increase of 70 per cent, over the rate of the last year, and hundreds will use coal and wood. The company accompanies its notice with a circular showing that at 33 cents per thousand gas is far cheaper than other fuel. The Council is willing to make a 20cent rate, but the company rejects the offer. The management advises patrons that if private agreements at 26 cents are made they will waive none of their rights in any lawsuits that may follow. Democratic.

FORT WAYNE, Ind., Nov. 6.- The official canvass to-day of the county ticket showed the Republicans' claims of the election of three candidates were correct. Owen N. Heaton, law partner of former Judge Wm. J. Vesey, was elected judge of the Superior Court over John H. Aiken, the Democratic incumbent, by 355 plurality, reversing the plurality of 2,300 of two years ago. Jacob Funk was elected treasurer over Adolph Schulte by 476. Dr. J. E. Stultz was elected coroner over John Wilkinson by 504. W. H. Clements, Republican candidate for the Legislature, came within 99 votes of defeating the low man on the Democratic representative ticket. Robinson's plurality was cut very low-1.319-and if Gilhams had not suffered because of the county fights in Steuben, No-

ble and Lagrange he would have been elected to Congress. The official count of the vote for congressman gives Robinson 1,319 plurality in this county, a loss of over 1,000. Whitley gives him 118 and De Kalb, estimated, 320 a total of 1,757. Against this Gilhams received 92 plurality in Noble, 609 in Lagrange and about 800 in Steuben. This gives Robinson a majority of 256. In 190 his plurality was 628. The canvassin board of De Kalb made slow progress and the official returns from that and from Steuben may slightchange this figure. Mrs. Geo. B. Noble of West Union, Ia., "caused, the physician said, by improper food. He advised a diet of milk, but she did not gain in either health, weight or brightness, and we had to continually use physic. "We were simply wild, hopeless and miserable over our little one. For a long time I had been reading of Grape-Nuts, and perthe steamer Grenada, from Trinidad. When the crew left the vessel on Oct. 18 they took to the long boat, and after many privations succeeded in reaching Grenada on Oct. 25, having covered a distance of 1,450 have never used any since. It was wonderful to see her improve. Her weight was 174 pounds at two years; now it is 27 pounds at two years and four months. The doctor had ear for her brain, the spasms having come from her spine, but the continued use of Grape-Nuts has made her perfectly well, and there is not a brighter child in the

State to-day than our little girl.

"Everybody remarks about her beautiful complexion and her bright, witty speeches. We are never now without Grape-Nuts and often think of the awful period when we were in such desperate straits. Losses by Fire.

OMAHA, Neb., Nov. 6.-A fire which started to-day in the jobbing house of Fairbanks, Morse & Co., dealers in scales and engines, did about \$50,000 damage. Of this amount the jobbing house loses \$35,000 on stock, \$8,000 is on the building, and the American Press Association, stock and linotype machines, \$7,000. Captain Olsen, of engine company No. 2, fell from a ladder to the pavement while carrying a line of hose to the second story and received what may prove fatal injuries. Engineer John Reed, of the same company, suffered a broken ankle and body bruises. About 150 country newspapers are temporarily affected by the burning of the American

Press plant. NASHVILLE, Tenn., Nov. 6 .- The Model flour mill and a large wheat elevator adjoining were destroyed by fire here early this morning. The total loss approximates \$240,000, which is partly covered by insurance.

A Mistake of Many Towns. Architectural Record.

Springfield, Mass., like so many other towns, turned its back on the river when the railroad was built. It appeared that the river had lost its usefulness. It would never now be the highway of travel. The "water-gate" of Springfield would not be the city's main entrance, but only a side door-and an almost disused one at that, It happened that the river was majestic and beautiful, the most beautiful feature that Springfield had, but that was not considered in the rush for the new entrance. The enterprising railroad, hideous as it was, was permitted to spread its black and dirty length along the lovely river margin, that the swift trains might the better mock the slow craft on the river, and the town relinquished completely its opportunities and possibilities for river enjoyment. The only peculiar fact
